TechVerito

Overview

TechVerito is a technology software services company founded in Pune. TechVerito has worked with customers in Kids Gaming, Education, Fintech, Retails, Banking and Non-profit organizations.

TechVerito has the experience to deliver carefully crafted software. The team has an excellent track record in delivering full-stack solutions in a distributed environment using technologies like Ruby, GoLang, Node, Java, Kotlin, GraphQL, Microservices, Angular, React, Vue. We also work on DevOps tools like Docker, Kubernetes, GitLabCI, Jenkins, CHEF, AWS.

We are passionate XP practitioners, engaging all our clients with their end-to-end product delivery - right from discovery and defining the right problem & solving those problems with appropriate IT along with measuring all the corners of the product journey throughout.

Selection Process

1. Programming Round

We will send you the coding problem. You will be given the appropriate time to write a solution for the same and you can share it as a zip file, upload it on your google drive and reply back to the same email with the google drive link.

2. Code Pairing Round

We review your submitted code, If your code is object-oriented, we schedule a code pairing round. In this round, our panelist would work with you on your submitted code.

3. Technical Round I

One of our panelists would be there to take the technical round and it would be a purely technical round based on your candidature.

4. Technical Round II

One of our panelists would be there to take the technical round and it would be a purely technical round based on your candidature.

5. HR Round

One of our HR people would be there to take the HR Round.

Location

Work from home till Covid19 situation.
